

FOR IMMEDIATE RELEASE

GeoMetrix Releases Online Designer for Training Partner 2003

Victoria, BC, September 16, 2003: With the introduction of Training Partner 2003 Online, GeoMetrix Data Systems Inc. is proud to introduce a revolutionary new Online Designer. The Training Partner Online Designer is a third-generation HTML tool that lets clients completely customize the Training Partner Online learning management environment.

Used by organizations such as Lockheed Martin NE&SS, KLA Tencor and New Horizons Computer Learning Centers, Training Partner is designed for comprehensive management of both instructor-led training and e-learning. Using this new HTML tool, web designers can alter or replace any part of the system to accommodate even the most complex business processes within an organization.

“This powerful new tool was used exclusively to rewrite a new Training Partner Online interface from the ground-up in an astonishing eight-week period,” said Justin Hearn, President of GeoMetrix. “Tasks that traditionally required months of custom development can now be accomplished in days,” stated Hearn. “And in addition to unmatched performance and ease-of-use, the system offers the unique ability to support upgrades without costly redevelopment.”

The secret to this Online Designer’s success is a customizable library of web-based components that provide virtually limitless extensibility for the Training Partner learning management system. Training Partner Online already offered customization of training pages to match organizational web sites. The new Online Designer lets clients use predefined and user-defined HTML elements to completely rebuild their Training Partner web pages.

“Custom learning management solutions created with the Online Designer can be deployed without the need for plug-ins or special firewall configuration,” continued Hearn. “Performance is increased from previous systems by as much as ten times using compiled code rather than slower interpreted code found in ASP and script-based systems. And installing maintenance releases or new versions of Training Partner Online is accomplished with a minimum of time and effort thanks to the system’s unique component-based architecture.”

The Training Partner Online Designer is the first tool in the industry to offer organizations complete control of their learning environment without the expense of developing and maintaining a custom system. No other learning management technology offers the ease-of-use, performance, flexibility and a seamless upgrade path for today’s cost conscious organizations.

GeoMetrix will be showcasing Training Partner 2003 and its new Online Designer at the Online Learning 2003 Conference & Expo. For a demonstration, please visit booth #613 at the Los Angeles Convention Center from September 22-24.
